5411. DEGRANOL (BCM) IN UROLOGICAL PRACTICE - Balogh F. Urol. Clin.,
Univ. of Budapest - THER. HUNG. 1958, 6/2 (21-22) Tables 1
The author gives a short general survey of the chemotherapy of tumours, with
special reference to the Hungarian drug Degranol. So far it has been employed at
the Urological Clinic in 37 cases of malignancy. A favourable effect has been ob-
served in the treatment of cancer of the prostate.

EXCERPTA MEDICA Sec 16 Vol 7/12 Cancer Dec 59

*5194. **Precancerosis in prostatic adenomas, and occult prostatic carcinomas.** A prostatic adenomában előforduló praecarcinosis és occult prostatarákok. BALOGH F. and PINTÉR J. Orvostud. Egyet. Urol. Klin., Budapest Mag. Onkol. 1959, 3/2 (69-76) Tables 1 Illus. 3

The questions of precarinomatous conditions and occult carcinoma of the prostate are described in detail, on the basis of the material of the urological hospital of the Budapest University. From 1934-1954, 3,185 patients with adenoma of the prostate were examined. Out of these, 1,004 were treated by prostatectomy and 370 by transurethral resection of the prostate. Out of the patients who underwent prostatectomy an occult carcinoma was found in 2 cases (5.2%); out of those treated with resection this disorder was found in 19 cases (7%). Most cases were adenocarcinomas, in 2 cases squamous-cell carcinoma was found. Diagnosis of occult carcinoma of the prostate becomes more frequent if the histological examination of the removed prostate is carried out in serial sections. On the basis of the clinical features of the material examined the relative benignity of occult carcinoma of the prostate is stressed.

"Urological Diseases of the Aged."

Budapest, Magyar Sebeszet, Vol XVI, No 2, May 1963, pages 121-124.

Abstract: The author discusses the changes of hormone production with age and some of the more common diseases associated with them. Adenoma of the prostate, prostate carcinoma, its differential diagnosis and modes of treatment are discussed. Hormone treatment is strongly advocated. Trigonitis, collum cystitis of women seem to be also a function of hormonal changes. Nephrosclerosis, kidney and bladder tumors, urogenital tb and nephrolithiasis of the aged are mentioned.

"Clinical Experiences with the Treatment of Cancer of the Bladder with Cytostatics"

Budapest, Magyar Onkologia, Vol 10, No 4, Dec 1966; pp 232-235.

Abstract [Authors' English summary, modified]: It is shown that it is necessary to administer cytostatics to patients with inoperable tumors of the bladder, in addition to applying highly developed therapeutic methods. Cytostatics may be administered also in cases where other methods (operation, X-ray irradiation) are not applicable. Objective as well as subjective improvement can be achieved with cytostatic treatment. 3 References, of which 1 Hungarian, other 2 German.

"Prevention of Acute Renal Insufficiency on the Basis of Experimental Observations."

Budapest, Kiserletes Orvostudomany, Vol XIX, No 1, Jan 67, pages 24-27.

Abstract: [Authors' Hungarian summary] According to the experimental results, the prophylactic administration of mannitol may prevent the development of the so-called postischemic renal insufficiency which follows ligation of the renal artery. As compared to the non-treated controls, there was a decrease in mortality from 90 to 25 per cent. On the basis of the experimental data, when administered at the right time, mannitol can be used with success in the treatment of the functional phase of acute renal insufficiency. 3 Hungarian, 16 Western references. ABSTRACT: In the course of the innovation movement at the State Office for Geodesy and Cartography [location not given] a number of worthwhile suggestions were received. These include a method for the rapid and economical updating of cadastral maps (submitted by Bone, Andras); continuous densitometry of a photogram during development (submitted by Gerencser, Miklos); angle measurement with the aid of astronomical azimuth determination (submitted by Nemeth, Ferenc); a method for eliminating film distortion in photogrammetric coordinate determinations (submitted by Magyarosi, Bela), and a seven-digit trigonometric angle-function table (submitted by Tamas, Ferenc). These suggestions were briefly discussed and the savings and/or other improvements attained with their aid were
